

GROUND SAFETY RECOMMENDATION

Ground Service Equipment - Pavement slopes

- ✓ While aircraft parked, the Ground Service Equipment shall be correctly positioned in the dedicated areas in order not to obstruct embarking / disembarking of passengers and PRM, or other activities such as fuel supply, technical checks, catering or loading/unloading of cargo and luggage;
- ✓ Any equipment or car shall always have the safety or **parking brake inserted**, and, where provided, the **stabilizers shall be inserted** - always;
- ✓ Motor powered GSE and cars **shall always be guarded**
- ✓ Pay Specific attention during the winter season: possible formation of ice and wind could create **additional risks for non-braking equipment**.

*For additional safety and to prevent unexpected movement of the GSE while parked, **additional safety chocks on the wheels are suggested.***

In order to mitigate any risk related to handling operations in airside and to prevent damage to aircraft and personnel injuries, **all operators** must use GSEs and service cars in compliance with the above-mentioned Safety Standards.

RAMP AGENTS ARE ALWAYS RESPONSIBLE FOR THE CORRECT APPLICATION OF SAFETY PROCEDURES

Be safe at all times!
